which the man shall work. All the reports are made and the bookkeeping of the railroads is done according to the rules of the United States government through the interstate commerce commission and upon the forms prescribed by that commission. There is scarcely any item of management not directly under the scrutiny of the government at Washington or Chicago.

"We are now facing an entirely new order, a new labor condition. When the United States Railroad Labor board made the largest advance in wages ever recorded, amounting, indeed, to more than \$720,000,000 a year, the railroads accepted the decision without resistance. The men at that time did not question the jurisdiction of the board in making this enormous advance.

"The railroads promised last October to pass on to the public in reduced rates any savings in operating expenses resulting from wage cuts. Rates have been reduced since last January \$400,000,000—\$265,000,000, approximately, more than wages have been cut based on the earnings in 1921 or \$500,000,000 if we compare with 1920.

"If total earnings do not increase very materially, the rate reductions and the recent wage cuts will allow the railroads about 3 1/2 per cent on their valuation. There is a difference of about \$443,000,000 between this 3 1/2 per cent and the 5 3/4 per cent which the interstate commerce commission says the roads may earn.

"If the net return from your business were reduced as the net return of the roads has been you probably would close it out.

"Your business will prosper largely according to the volume the roads can handle promptly. The whole present controversy, therefore, becomes as much your concern as it is the concern of the railroads, because investors are assured a reasonable reward new capital will not be available and without this it will not be possible to provide adequate facilities.

"The tie that binds this people together in national unity is the railroad tie, and if it isn't kept in good repair the neglect can easily create a national calamity for which every man and every family will have to pay.

"The public, the speaker said, will be benefited by the recent rate reductions, in part, are reflected in lower prices instead of in increased profits.

## SILVER PICK IS IMPROVING ON FOURTH LEVEL

Hanging Wall of North Drift Shows Two to Four Feet of Hundred Dollar Ore

Ore has at last been found on the fourth level of the Silver Pick lease on the Red Top, an event that had been awaited for months. Sunday there was on the hanging wall side of the north drift on the fourth level a two to three-foot width of what was estimated to be about \$100 ore and the drift was being turned so as to crosscut the ore. A few more rounds should put this drift well into the extension of the orebody from the intermediate level and give 65 to 75 feet of stopping ground between the levels. This orebody on the fourth level is the extension of that stopped between the third and the intermediate and now being stopped from a raise from the fourth to the intermediate.

A raise from the top of the main slope has been extended 25 feet. This raise is in material giving varying assays. Although no ore is being saved from it, the raise, now being driven in a "lean" part of the shoot above the slope, is important, as it is in the oxidized zone above the third level that it is expected richer ore than any yet found in the lease will be opened.

Ore for shipment continues to come from the main slope above the intermediate, and also from the top of the raise from the fourth level. There is a considerable tonnage immediately available at the latter place, both to the north and south of the raise.

Four air drills are being used, which is not enough to care for all the development that should be done and the company is negotiating for a compressor to be used as a "booster" for the one now supplying the drills. With another compressor in use the required development can be done without interfering with the breaking of ore.

It is expected that there will be cut in half after the novelty had worn off but was confident that a circulation of 20,000 would be maintained. Probably half of the foreign population he estimated would take the paper while the other 20,000 he would have to rely on the Japanese students. These young men and women, now that English is compulsory in the schools, are avid readers of the paper and they find the newspapers printed in English fine text books, while at the same time they gather some knowledge of foreign affairs.

## CIRCULATION LARGE WITH NEW ENGLISH

TOKIO, June 27.—(Associated Press by Mail.) It is estimated that there are 5000 foreign residents in Japan at present, exclusive of Chinese, so it was somewhat surprising to the uninitiated to find an English language paper recently started a circulation of 45,000. The editor explained, however, that he ex-

No order of job printing is too large or too small for The Bonanza to fill. We employ only the most skillful and artistic printers. Prompt service assured.

### PARLOR CAR

## Unexpected!

a New "USCO"—

Better, Heavier, Longer Wearing

30x3 1/2—\$10.90 No Tax added

on Sale Now

USCO set the high value mark for 30 x 3 1/2 tires when it originated the \$10.90 price last fall.

USCO today betters that mark with a new and greater USCO—an USCO improved in many important ways.

For instance, a thicker tread—with a surer hold on the road—thicker side walls, adding strength and life to the tire.

And the price is \$10.90—with the tax absorbed by the manufacturer.

Men have always looked to USCO for the biggest tire money's worth on the market.

They always get a bigger tire money's worth than they expect.

No Tax
